(54) MOBILE CAMERA

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a mobile camera capable of relieving a load of a central arithmetic processing apparatus and sequentially or simultaneously transferring a plurality of images.

SOLUTION: An output signal group A of an image pickup apparatus 1 is connected to an input signal group B of an image processing apparatus 2. The input signal group B is respectively connected to an image processing path (1), an image processing path (2),..., an image processing paths (n) in the image processing apparatus 2. Output signals H1, H2,..., Hn of the image processing paths (1), (2),..., (n) are respectively connected to a data bus 3'. An interface signal I from the data bus 3' is connected to a central arithmetic processing apparatus 4', an intermediate frequency signal J is connected to a display apparatus 5', and an intermediate frequency signal K is connected to a storage device 6'.
